Stream AMP 100

2 SPEAKERS, STREAM AMP: A WORLD OF MUSIC

Once connected to your home network via Ethernet or Wi-Fi, Stream AMP 100 allows you to stream all your locally stored digital music files, thousands of internet radio stations as well as Spotify and Deezer. The Stream AMP 100 is fitted with an optical SPDIF input which can be connected to a flat screen TV or a CD player, two analogue and one USB inputs. The latter enables access to music files on memory sticks or HDDs. Instant Bluetooth Aptx connection is possible with NFC enabled smartphones and tablets.

2 OR 4 SPEAKERS

Stream AMP is fitted with four loudspeaker outputs and a power optimisation impedance switch. It is possible to choose between stereo with one or two pairs of speakers or mono distribution with two or four groups of speakers. Designed for use in a professional system, it can for example amplify up to 8 of our Archipel In-Ceiling speakers and is controlled by Wi-Fi from any room in the house.

STREAM AMP OPTIMISES CABASSE SPEAKER INTEGRATION

StreamAMP provides 4 types of room adaptation for Cabasse speakers. Using the app simply select which speakers are used where they are positioned in the room. The improvement, which is stunning with compact speakers thanks to the obvious low-end extension benefits, is also obvious with floor-standing speakers, with more air and definition across the entire bandwidth.

SPECIFICATIONS

Amplification

2 x 50 W RMS/4-8 Ω or 4 x 25 W RMS/4-8 Ω

Formats audio (WiFi/RJ45)

WMA (WMA9, CBR, CBR, up to 320kbps)

PCM (16 bits-44.1kHz, 24 bits-44/48/96 kHz,

fichiers .wav, .aiff, .aifc, HTTP streams)

AAC-LC (up to 320 kbps), ALAC (.m4a)

FLAC (16 bits-44.1 kHz, 24 bits – 44/48/96 kHz)

Network 10/100Mb Ethernet- MAC & PHY- Wireless LAN 802.11b/g/n- WPS 2.0 security

Digital media renderer (DLNA 1.5 norm)

Dimensions (h x w x d)

91 x 218 x 190 mm - 3.6 x 8.6 x 7.5 in.

Weight

1,9 kg - 4.2 lbs
